Kuylenstierna & Skog Equities, a sub-fund of the LUX MULTIMANAGER SICAV

Class A SEK – Capitalisation shares: ISIN LU1128908230

Management company: BIL Manage Invest S.A.

OBJECTIVES AND INVESTMENT POLICY

- The sub-fund's investment objective is to provide long-term capital appreciation. The Fund will invest in a selected portfolio of equity securities of companies with a potential for high growth and high future profitability.
- The sub-fund will primarily invest in listed equities and equity related securities.
- The sub-fund does not limit the investments to certain geographical markets or economic sector, but has a bias towards investing in the Nordic stock markets.
- The sub-fund may invest up to 15% of its asset in debts securities, in exceptional circumstances only and when market conditions so command, such limit may be exceeded but up to 40% of the sub-funds assets.
- Furthermore the sub-fund may invest its assets in other Undertakings for Collective Investment ("UCI"), and up to 10% of its assets in warrants and subscription rights based on Transferable Securities.
- If considered appropriate and in your best interest, the sub-fund can hold up to 100% of its net assets in liquid assets, money market funds and money market instruments.
- To a limited extent the sub-fund may also invest in interest bearing instruments with low credit rating, structured products like credit linked notes, participation notes, capital protected notes, or certificates. In addition up to 20% might be invested in asset-backed and mortgage-backed securities.
- The sub-fund has no benchmark and is actively managed.
- Subscription and redemption of shares can normally be made every banking day in Luxembourg, except on 24th and 31st of December.
- All dividends will be reinvested in the Fund.
- The sub-fund is suitable for investors with an investment horizon of 5 years and more.

RISK AND REWARD PROFILE

- The risk and reward profile is classified by the level of historical fluctuation of the net asset values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level. If the fund was launched less than 5 years ago, the risk category is calculated on the basis of the performance of the benchmark; if this is not available, other objective classification criteria are used.
- The historical data may not be a reliable indication for the future.
- The indicated risk category is not guaranteed and may shift over time.
- The lowest category does not mean "risk-free".
- There is no guarantee or mechanism to protect the capital.

Risk factors not sufficiently captured by the synthetic risk and reward indicator

- Equity funds are prone to large fluctuations of the value of the shares. The sub-fund might be exposed to small and medium sized companies. This might result in higher risks than seen in funds that mainly invest in larger companies.
- **Credit risk:** When the sub-fund invests, directly or indirectly, in interest bearing instruments, such as bonds, there is a risk that the issuer of such instruments cannot pay interest or return the nominal amount of the instrument at maturity. This means that the instrument can lose some or all of its value.
- **Counterparty risk:** The risk that a counterpart does not fulfil its obligations to the sub-fund e.g. not paying an agreed amount or not delivering securities as agreed.
- **Liquidity risk:** The risk that the sub-fund cannot sell, redeem or close a position in a timely manner, and that the price could be lower or higher than expected, due to the liquidity situation in the underlying market.
- **Operational risk:** The sub-fund could suffer losses as a result of external events, criminal activity, system breakdowns or errors committed by parties related to the sub-fund and its delegates, a custodian and external third parties.
- **Currency risk:** Movements in currency exchange rates can adversely affect the return of your investment. The currency hedging that may be used to minimize the effect of currency fluctuations may not always be successful.

Further information about risks can be found under the heading "Principal Risks" in the Prospectus.
